

ASITE™

Driving digital transformation
for the Built Environment

Acumatica Integration Overview
September 2023

Asite Project Workflow – *Designed to meet the needs of Today's Contractor*

Asite Project Workflow

Plan, design, and build collaboratively throughout the building lifecycle.

Build Better

Common Data Environment (CDE)		Project Controls	Field Operations
Collaborative BIM	Advanced Tasks	Incidents RFI's, CO's Submittals	Site Tasks
Digital Engineering	Project Control Forms	Daily Field Reports	Quality Assurance
IFC Model Server	Design Coordination	Meeting Minutes	Inspections & Permits
Document Management	Project Reports	Photo Logs	Health & Safety
Field CDE	Project Handover	Punch Lists & Check Lists	Site Progress Tracking

Far Superior to In Market Solutions

The Power of Enterprise Delivered to You

Unmatched Configurability
Workflows to Fit Your Business
Full Control Over Folder Structures
Unlimited Attributes
Full Portfolio View
Create or Modify Any Form
Tailor Dashboards for Every Role/User

Unparalleled Collaboration
Real-time chat / messaging
Revision Control and Comparison
Powerful Notification and Tracking

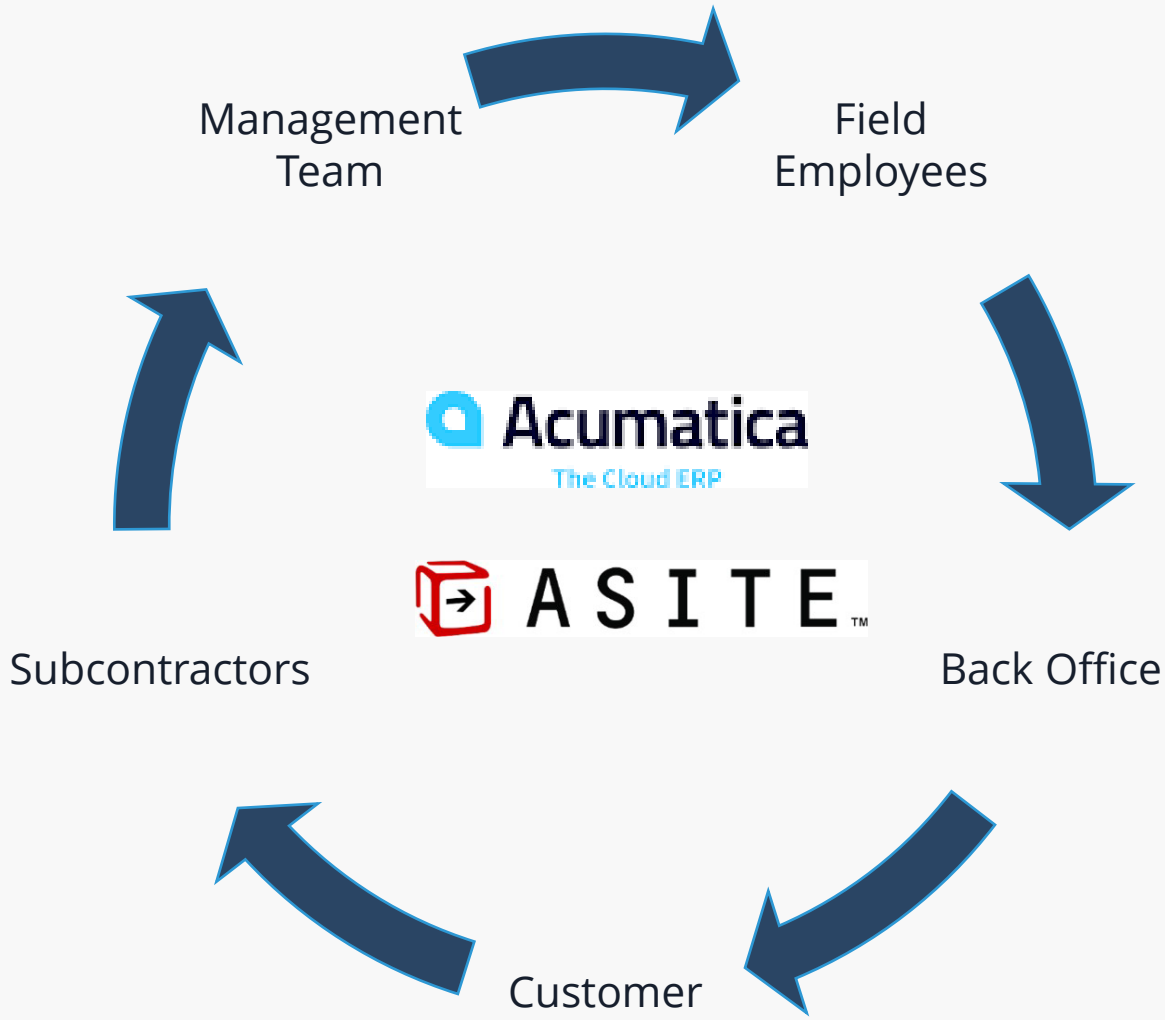

Platform as a Service with Open Architecture

Acumatica The Cloud ERP

REST API

- Analytics & Dashboards
- Field
- App Builder
- Digital Archives
- Visual Workflow
- Security & Compliance
- Team Collaboration
- Exchange Integration Hub
- Open Data APIs
- Asite Sync

Project Information Cycle – Project Financials in Acumatica

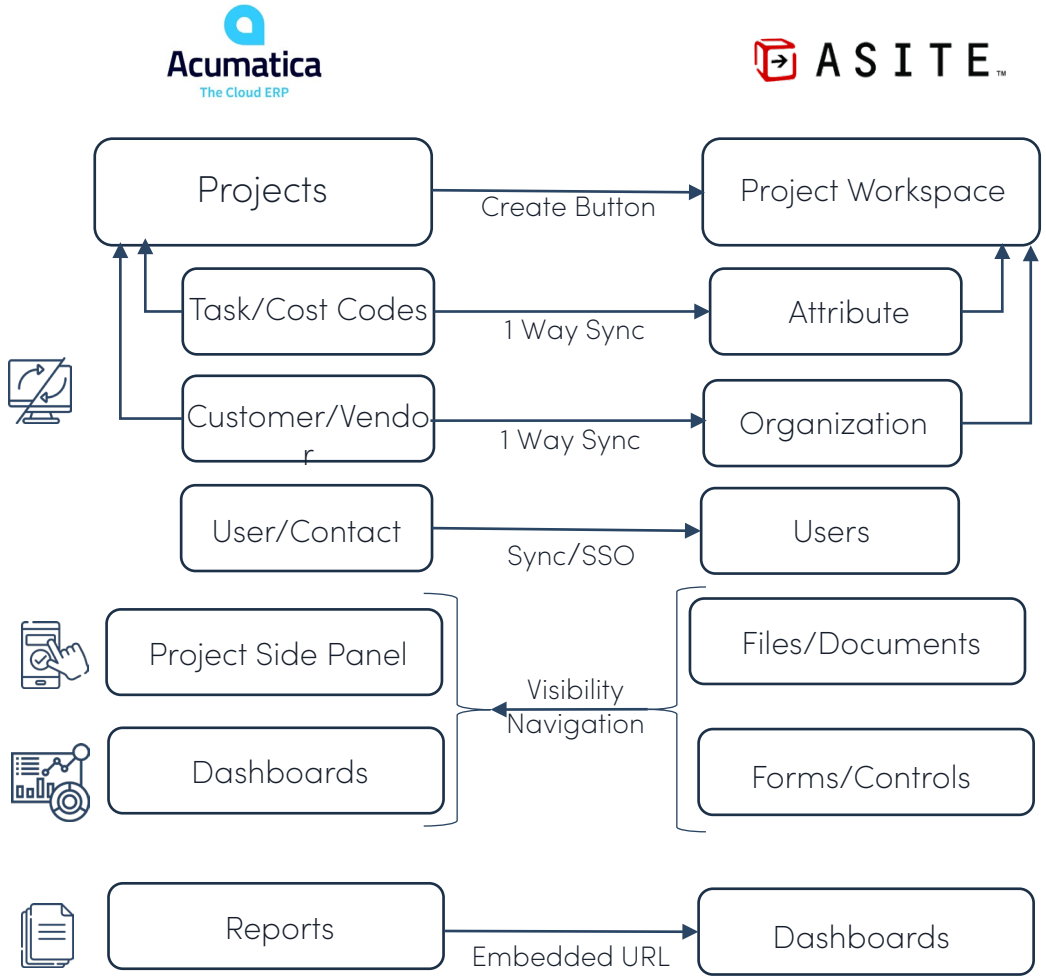

Acumatica <> Asite

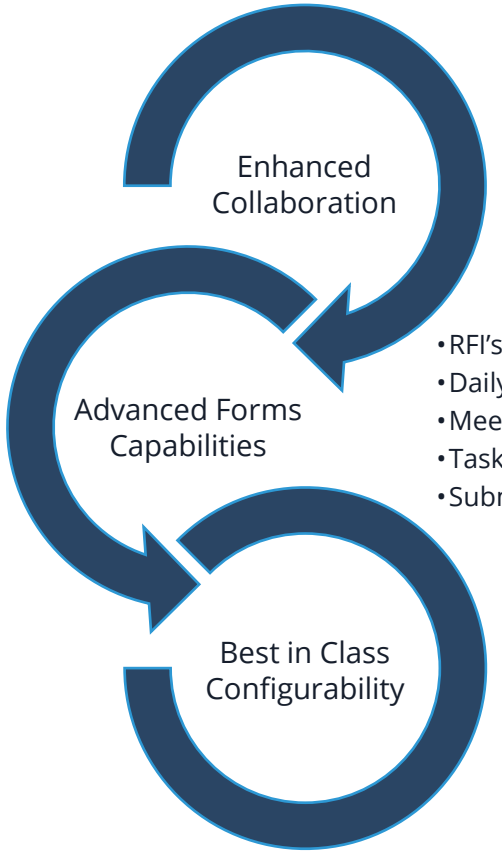

"If the requirement has financial ramifications and Acumatica provides Suitable functionality for the process, then it should be handled by Acumatica".

Acumatica – Asite Integration

Master File Integration

Enhanced Project Management Experience

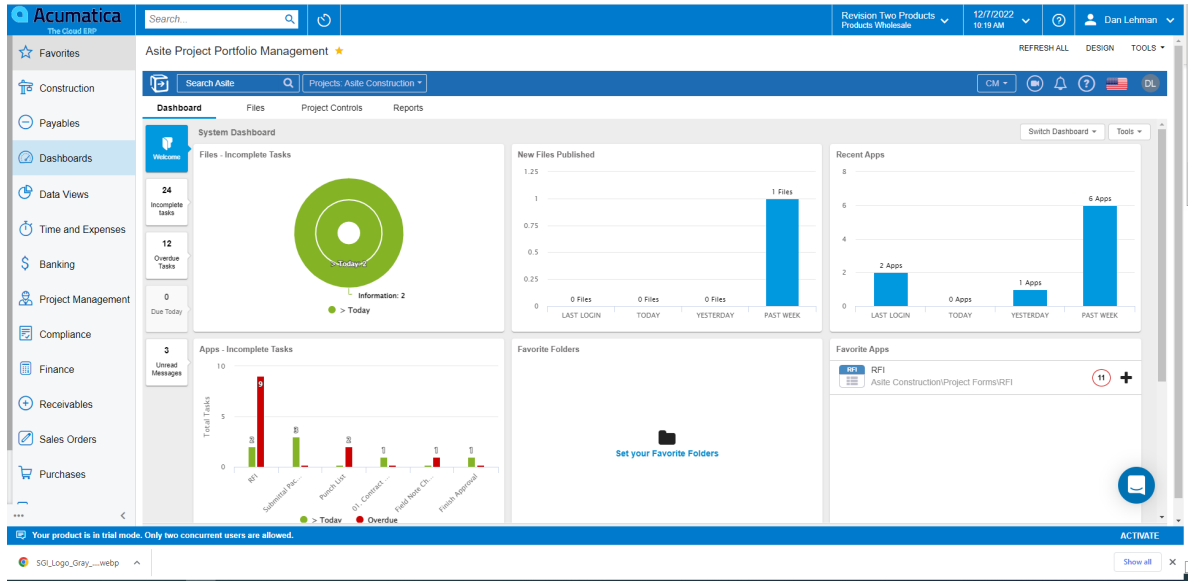

- Documents & Drawings
- Specifications
- Submittals
- Photos

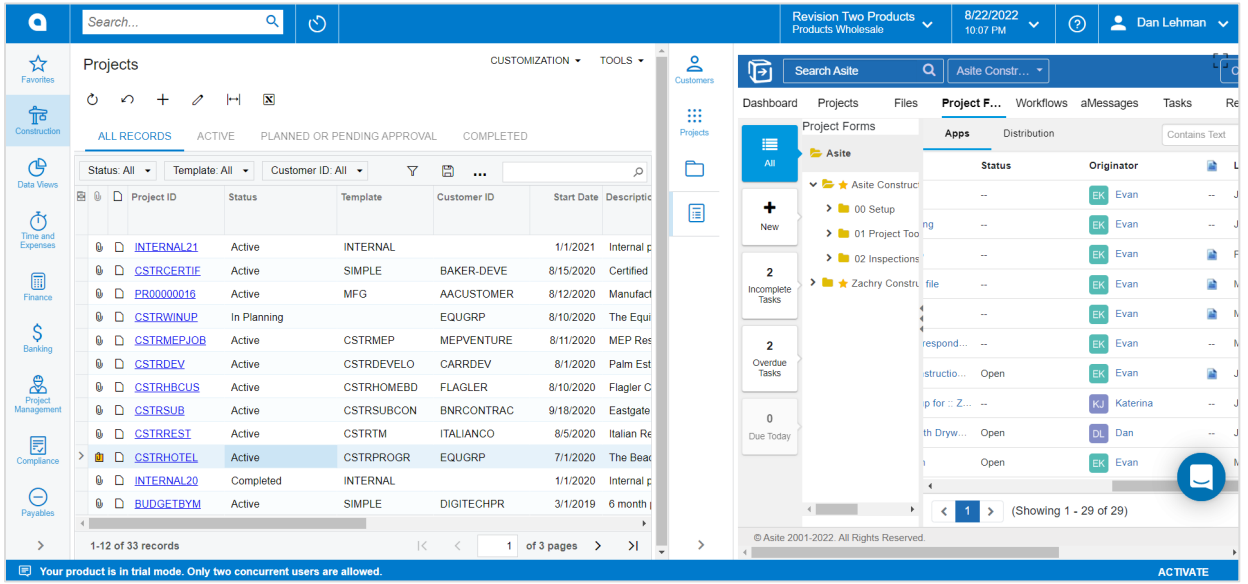

- RFI's, CO Requests
- Daily Field Reporting
- Meeting Minutes
- Tasks, Site Photos
- Submittal Packages and More

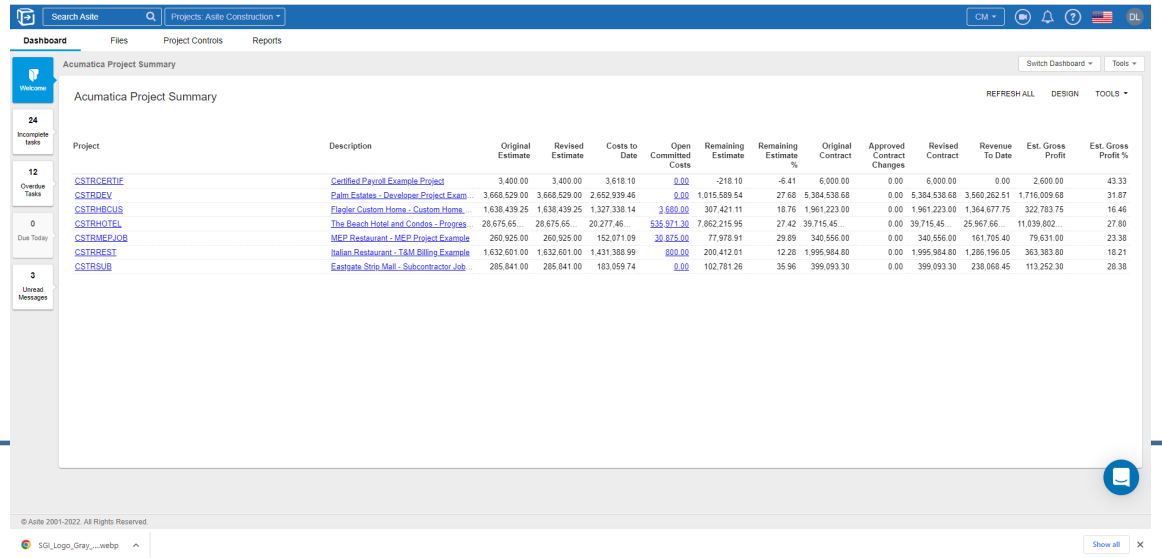

- User-Definable Workflows
- Unlimited Meta Data
- Configurable Folder Structures

Acumatica and Asite offers a Singular User Experience

Ability to run the Asite and Acumatica applications "inside" of each other creates a unique experience

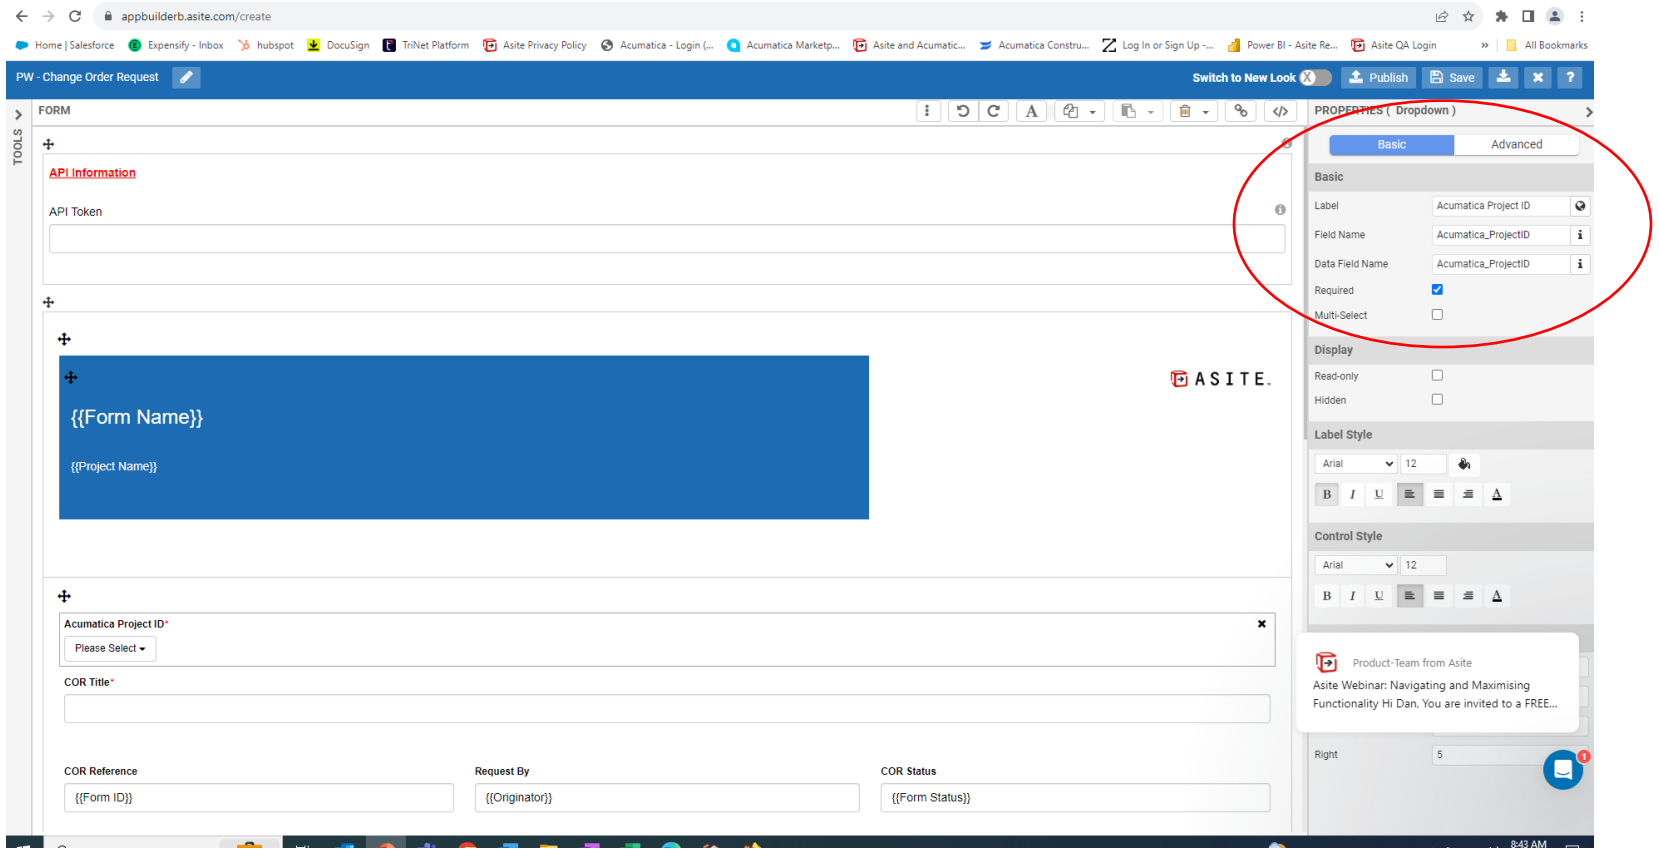

Initiate Acumatica Transactions from Asite Forms

Easily connect the Asite AppBuilder to the Acumatica Database

With the Asite AppBuilder tool you can easily connect any form directly to the Asite database to pull or push information.

A great example of the value of this functionality is the ability to initiate a change order request in Asite and have it automatically create the corresponding record in Acumatica

A new dawn for digital engineering
Simpler, Faster, Smarter
